

MOONJACK

The story

MoonJack is a Flapjack Octopus with a dream of visiting the moon. When he tells the others of his dream, they laugh and call him crazy. He didn't give up and became the oceans first astronaut. MoonJack learned something special from that journey to the moon. He learned that just because other people may doubt your dreams, doesn't mean that you should too. Therefor our Moonjack Token is also created to make dreams come true for our community.

How it works

Moonjack employs 2 simple functions:
Reflection + LP acquisition

We are also working to create a utility function for our token, when our game has been developed. Check out our NFT page to see which moonjacks are already available on Opensea.

There will only be 475 Moonjacks available and this will make our collectibles very rare. The first 9 are already available to purchase on Opensea. We will donate 10% of all NFT sales to a charitable cause.

5% of all transactions is redistributed to our community of holders, proportional to the Moonjack Tokens they hold. This way our holders are earning a passive income (when price is stable or increasing)

5% of all transactions will be added to the liquidity pool in Pancake swap, to create a steadily rising pricefloor.

THE FEATURES

100% Safe - Locked Liquidity

70% of the Liquidity of is auto-locked at launch in Partnership with DxSale. The remaining 30% of the presale will be used for start up costs like Contract creation, audit and other startup costs.

The liquidity pool in Pancakeswap is forever increasing with every transaction and is locked.

Burning

Burns are a fundamental part of any cryptocurrency. A continuous burn can be nice in the early days of the project, however, if it is not controlled then the project could suffer greatly. Having burns controlled by the team helps to keep the community moral high. The conditions of the manual burn and the amounts can be advertised and tracked.
